During the third quarter of 2016, the Valuation Committee, which is composed of three independent directors, adjusted the fair values of the private companies in our portfolio. In arriving at these determinations and consistent with the Fund’s valuation procedures, the Valuation Committee took into account many factors, including the performance of the portfolio

companies, recent transactions in the companies' securities, as well as the impact of changes in market multiples within certain sectors.

In the third quarter of 2016, the Fund earned approximately \$240,011 in investment income. The Fund reported a net investment loss of approximately \$920,000. The Fund reported net realized and unrealized losses on investments of approximately \$8.58 million for the quarter.

On September 30, 2016, Nutanix, Inc., a holding of the Fund since 2015, completed its initial public offering (IPO). The IPO was priced at \$16.00, and closed at a price of \$37.00 on September 30, 2016.* The Fund holds 459,772 shares of Nutanix common stock as of September 30, 2016, at an approximate average cost of \$16.04 per share.

Throughout the quarter, the Fund continued its efforts to manage its portfolio prudently, including working with its portfolio companies and their management teams to seek to enhance performance and uncover potential exit opportunities.

*For the purpose of calculating the Fund's NAV as of September 30, 2016, we used a value of \$31.45 per share of Nutanix common stock, reflecting a 15% discount to the \$37.00 closing market price on that day because the shares held by the Fund are subject to a 180-day lockup provision.
