

U.S. SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period of March 31, 2026

or

TRANSITION QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 333-168195

FIRSTHAND TECHNOLOGY VALUE FUND, INC.

(Exact Name of Registrant as Specified in Charter)

Maryland
(State or Other Jurisdiction of
Incorporation or Organization)

27-3008946
(I.R.S. Employer
Identification No)

150 Almaden Boulevard, Suite 1250
San Jose, California
(Address of Principal Executive Offices)

95113
(Zip Code)

Telephone Number, Including Area Code: (408) 886-7096

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common	SVVC	OTCQB

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer

Accelerated Filer

Non-accelerated Filer

Smaller Reporting Company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at March 31, 2026
Common Stock, \$0.001 par value per share	6,892,540

[Table of Contents](#)

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the Common Stock held by non-affiliates of the registrant as of March 31, 2026 was approximately \$84,000 (computed using the closing price of \$0.02 per share of Common Stock on March 31, 2026, as reported by OTC Markets Group).

As of March 31, 2026, Firsthand Technology Value Fund had 6,892,540 shares of common stock, par value \$0.001 per share, outstanding.

Notes to Consolidated Financial Statements

March 31, 2026 (UNAUDITED)

NOTE 1. THE COMPANY

Firsthand Technology Value Fund, Inc. (the “Company,” the “Fund,” “us,” “our,” and “we”), is a Maryland corporation and an externally managed, non-diversified, closed-end management investment company that has elected to be treated as a business development company (“BDC”) under the Investment Company Act of 1940, as amended (the “1940 Act”). The Company acquired its initial portfolio of securities through the reorganization of Firsthand Technology Value Fund, a series of Firsthand Funds, into the Company. The reorganization was completed on April 15, 2011. The Company commenced operations on April 18th, 2011. Under normal circumstances, the Company will invest at least 80% of its assets for investment purposes in technology companies, which are considered to be those companies that derive at least 50% of their revenues from products and/ or services within the information technology sector or the “cleantech” sector. Information technology companies include, but are not limited to, those focused on computer hardware, software, telecommunications, networking, Internet, and consumer electronics. While there is no standard definition of cleantech, it is generally regarded as including goods and services designed to harness renewable energy and materials, eliminate emissions and waste, and reduce the use of natural resources. In addition, under normal circumstances we will invest at least 70% of our assets in privately held companies and in public companies with market capitalizations less than \$250 million. Our portfolio is primarily composed of equity and equity derivative securities of technology and cleantech companies (as defined above). These investments generally range between \$1 million and \$10 million each, although the investment size will vary proportionately with the size of the Company’s capital base. The Company’s shares as of September 30, 2023 were listed on the NASDAQ Global Market under the symbol “SVVC.” Subsequent to September 30, on October 6, 2023, the Company notified NASDAQ of the fund’s intention to voluntarily delist. As of the date these financial statements were issued the Company’s shares are quoted on the OTCQB market under the symbol “SVVC.” Firsthand Capital Management, Inc., which was previously known as SiVest Group, Inc. (“FCM” or the “Advisor”), serves as the investment adviser to the Company.

The Company is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946.

CONSOLIDATION OF SUBSIDIARIES. On May 8, 2015, the Board of Directors of the Company approved the formation of a fully owned and controlled subsidiary (as defined by the 1940 Act) of the Company named Firsthand Venture Investors (“FVI”), a California general partnership formed on March 30, 2015. After the close of business on June 30, 2015, the Company contributed substantially all of its assets to FVI in return for a controlling general partner ownership interest in FVI. The transaction was completed on July 1, 2015. Under this structure, we have all or substantially all of our investment activities conducted through our fully owned subsidiary, FVI.

During the fiscal years ended December 31, 2016 and 2017, with the approval of its Board of Directors, the Company organized three separate fully owned and controlled subsidiaries (as defined by the 1940 Act). Each subsidiary was a Cayman Islands corporation and the financial statements of each subsidiary were reported on a consolidated basis with the Company. Each subsidiary was formed for the purpose of holding one or more investments made by the Company, and was treated as a controlled foreign corporation under the Internal Revenue Code not separately subject to U.S. federal income tax. FVI was treated as the sole U.S. shareholder of each subsidiary.

The Board of Directors of the Company approved the liquidation of those three Cayman subsidiaries on November 2, 2018. That liquidation was completed on December 27, 2018.

Firsthand Technology Value Fund, Inc.

MARCH 31, 2026 (UNAUDITED)

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed in the preparation of the Company’s financial statements included in this report:

BASIS OF PRESENTATION. The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) pursuant to the requirements on Form 10-K. ASC 946, *Financial Services—Investment Companies* (“ASC 946”), and Articles 6, 10 and 12 of Regulation S-X. In the opinion of management, all adjustments, which are of a normal recurring nature, considered necessary for the fair presentation of the financial statements for the periods presented, have been included.

Under the 1940 Act, ASC 946, and the regulations pursuant to Article 6 of Regulation S-X, we are precluded from consolidating any entity other than another investment company or an operating company which provides substantially all of its services to benefit us. Consequentially, as of December 31, 2018, the Company consolidated some special purpose entities. These special purpose entities only hold investments of the Company and have no other significant asset and liabilities. All significant intercompany transactions and balances have been eliminated in consolidation.

USE OF ESTIMATES. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

PORTFOLIO INVESTMENT VALUATIONS. Investments are stated at “value” as defined in the 1940 Act and in the applicable regulations of the Securities and Exchange Commission and in accordance with GAAP. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market value of those securities for which a market quotation is readily available and (ii) the fair value as determined in good faith by the Advisor as the valuation designee appointed by the Board of Directors, and subject to oversight by the Board of Directors. On March 31, 2026, our financial statements include venture capital investments valued at approximately \$0.1 million. The fair values of our venture capital investments were also determined by the Advisor as the valuation designee. Upon sale of these investments, the values that are ultimately realized may be different from what is presently estimated. The difference could be material. Also see note 6 regarding the fair value of the Company’s investments.

CASH AND CASH EQUIVALENTS. The Company considers liquid assets deposited with a bank, investments in money market funds, and certain short-term debt instruments with maturities of three months or less to be cash equivalents. These investments represent amounts held with financial institutions that are readily accessible to pay our expenses or purchase investments. Cash and cash equivalents are valued at cost plus accrued interest, which approximates market value.

RESTRICTED SECURITIES. At March 31, 2026, we held \$144,314, in restricted securities. At December 31, 2025, we held \$169,165. in restricted securities.

INCOME RECOGNITION. Dividend income is recorded on the ex-dividend date. Interest income is accrued as earned. Discounts and premiums on securities purchased are amortized over the lives of the respective securities. Other non-cash dividends are recognized as investment income at the fair value of the property received. When debt securities are determined to be non-income producing, the Company ceases accruing interest and writes off any previously accrued interest. These write-offs are recorded as an adjustment to interest income.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

SHARE VALUATION. The net asset value (“NAV”) per share of the Fund is calculated by dividing the sum of the value of the securities held by the Fund, plus cash or other assets, minus all liabilities (including estimated accrued expenses) by the total number of shares outstanding of the Fund, rounded to the nearest cent.

REALIZED GAIN OR LOSS AND UNREALIZED APPRECIATION OR DEPRECIATION OF PORTFOLIO INVESTMENTS. A realized gain or loss is recognized when an investment is disposed of and is computed as the difference between the Company’s cost basis in the investment at the disposition date and the net proceeds received from such disposition. Realized gains and losses are calculated on a specific identification basis. Unrealized appreciation or depreciation is computed as the difference between the fair value of the investment and the cost basis of such investment.

INCOME TAXES. The Company provides for state and federal corporate income tax, as appropriate, because it is regarded as a corporation under Subchapter C of the Code. The Company recognizes interest and penalties in income tax expense.

FOREIGN CURRENCY TRANSLATION. The accounting records of the Company are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the foreign exchange rate on the date of valuation. The Company does not isolate that portion of the results of operation resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. The Company’s investments in foreign securities may involve certain risks, including without limitation: foreign exchange restrictions, expropriation, taxation or other political, social, or economic risks, all of which could affect the market and/or credit risk of the investment. In addition, changes in the relationship of foreign currencies to the U.S. dollar can significantly affect the value of these investments and therefore the earnings of the Company.

SECURITIES TRANSACTIONS. Securities transactions are accounted for on the date the transaction for the purchase or sale of the securities is entered into by the Company (i.e., trade date).

CONCENTRATION OF CREDIT RISK. The Company places its cash and cash equivalents with financial institutions and, at times, cash held in checking accounts may exceed the Federal Deposit Insurance Corporation insured limit.

OPTIONS. The Company is subject to equity price risk in the normal course of pursuing its investment objectives and may enter into options written to hedge against changes in the value of equities. The Company may purchase put and call options to attempt to provide protection against adverse price effects from anticipated changes in prevailing prices of securities or stock indices. The Company may also write put and call options. When the Company writes an option, an amount equal to the premium received by the Company is recorded as a liability and is subsequently adjusted to the current fair value of the option written.

Premiums received from writing options that expire unexercised are treated by the Company on the expiration date as realized gains from investments. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether the Company has realized a gain or loss. The Company as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option.

DEFERRED COMPENSATION.

On December 26, 2022, the Company adopted a deferred compensation plan (the "Plan") for its eligible directors which allows such directors to defer some or all of their fees for services as Directors to the Fund. Under the terms of the Plan, deferred compensation withheld is notionally invested in the Fund's common stock using the net asset value per share on the date such compensation would have otherwise been payable. The amounts deferred are booked as a liability on the Company's balance sheet, and the value of that liability will track the net asset value of the Company's common stock, as if it were invested in that common stock. The payments due to eligible participants are valued using the net asset value of the fund at the time the payments are due. On December 31, 2025, the Plan was amended to address if the NAV was \$0.00. Notational cash would be recorded in lieu of notational shares. As of March 31, 2026, each of the Fund's eligible directors has deferred 50% of their 2026 and 2025 compensation to the earlier of January 1, 2027, and January 1, 2026, respectively, or their separation of service from the Fund. Since the value of the notional shares track the Fund’s NAV on a quarterly basis, the accrued liability and expense for directors' fees may fluctuate significantly quarter to quarter in response to fluctuations in the Fund’s NAV. It is intended and expected that any eventual payout of the accrued liability calculated based on the notional shares shall be commensurate with the deferred portion of director compensation and would only be greater if the Fund’s NAV increased subsequent to the date(s) of the quarterly compensation deferral.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

NOTE 3. BUSINESS RISKS AND UNCERTAINTIES

We invest a substantial portion of our assets in privately-held companies, the securities of which are inherently illiquid. We also seek to invest in small publicly-traded companies that we believe have exceptional growth potential and to make opportunistic investments in publicly-traded companies, both large and small. In the case of investments in small publicly-traded companies, although these companies are publicly traded, their stock may not trade at high volumes, and prices can be volatile, which may restrict our ability to sell our positions. We may also be subject to contractual restrictions or securities law limits on our ability to sell portfolio holdings because of, for example, our affiliation with a portfolio company or the relative size of our holding in a company. These privately held and publicly traded businesses tend to lack management depth, have limited or no history of operations and typically have not attained profitability. Because of the speculative nature of our investments and the lack of public markets for privately held investments, there is greater risk of loss than is the case with traditional investment securities.

We do not choose investments based on a strategy of diversification. We also do not rebalance the portfolio should one of our portfolio companies increase in value substantially relative to the rest of the portfolio. Therefore, the value of our portfolio may be more vulnerable to events affecting a single sector, industry or portfolio company and, therefore, may be subject to greater volatility than a company that follows a diversification strategy.

Because there is typically no public or readily-ascertainable market for our interests in the small privately-held companies in which we invest, FCM as the Board's valuation designee pursuant to Rule 2a-5 under the 1940 Act. Those valuations are determined in accordance with the Valuation Procedures used by FCM, subject to oversight by the Board and are subject to significant estimates and judgments. The determined value of the securities in our portfolio may differ significantly from the values that would be placed on these securities if a ready market for the securities existed. Any changes in valuation are recorded in our Statement of Operations as "Net increase (decrease) in unrealized appreciation on investments." Changes in valuation of any of our investments in privately-held companies from one period to another may be volatile.

FCM has engaged an independent valuation firm to provide it with valuation assistance with respect to certain of our portfolio investments. FCM intends to continue to engage an independent valuation firm to provide assistance regarding determination of the fair value of select portfolio investments each quarter. The scope of the services rendered by the independent valuation firm is at the discretion of FCM as the valuation designee.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, the Board has approved a multi-step valuation process to be followed each quarter, as described below:

- (1) each quarter the valuation process begins with each portfolio company or investment being initially valued by the Advisor’s Valuation Committee or the independent valuation firm;
- (2) the Valuation Committee of the Board on a quarterly basis reviews the preliminary valuation of the Advisor’s Valuation Committee and that of the independent valuation firms and makes the fair value determination, in good faith, based on the valuation recommendations of the Advisor’s Valuation Committee and the independent valuation firms; and
- (3) at each quarterly Board meeting, the Board considers the valuations recommended by the Advisor’s Valuation Committee and the independent valuation firms that were previously submitted to the Valuation Committee of the Board and ratifies the fair value determinations made by the Valuation Committee of the Board.

NOTE 4. INVESTMENT MANAGEMENT FEE

The Company has entered into an investment management agreement (the “Investment Management Agreement”) with FCM pursuant to which the Company will pay FCM a fee for providing investment management services consisting of two components—a base management fee and an incentive fee.

The base management fee will be calculated at an annual rate of 2.00% of our gross assets. For services rendered under the Investment Management Agreement, the base management fee will be payable quarterly in arrears. The base management fee will be calculated based on the average of (1) the value of our gross assets at the end of the current calendar quarter and (2) the value of the Company’s gross assets at the end of the preceding calendar quarter; and will be appropriately adjusted for any share issuances or repurchases during the current calendar quarter. Base management fees for any partial month or quarter will be pro-rated.

The incentive fee is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date), commencing on April 15, 2011, and equals 20% of the Company’s realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid incentive fees, provided that the incentive fee determined as of December 31, 2026, will be calculated for a period of shorter than twelve calendar months to take into account any realized gains computed net of all realized capital losses and unrealized capital depreciation from inception. For the three months ended March 31, 2026, there were no Incentive fee adjustments.

Effective September 30, 2023, the Company entered into a fee waiver agreement with FCM (the “Fee Waiver Agreement”). Pursuant to the terms of the Fee Waiver Agreement, FCM agreed to (1) waive future accruals of the base management fee starting October 1, 2023, through December 31, 2024, with future recoupment to the extent permitted by the Investment Management Agreement, and (2) waive \$2.5 million of base management fee that has been accrued but unpaid prior to but unpaid as of September 30, 2023. Any accrued base management fee waived under section (2) may be recouped by FCM within ten years.

Effective March 31, 2024, the Company entered into a fee waiver agreement with FCM (the “Fee Waiver Agreement”). Pursuant to the terms of the Fee Waiver Agreement, FCM agreed to waive \$3.0 million of base management fee that has been accrued but remains unpaid as of March 31, 2024. Any accrued base management fee waived may be recouped by FCM within ten years.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

NOTE 5. DEBT

The Company currently has no plan to use leverage and does not have any significant outstanding debt obligations (other than normal operating expense accruals).

NOTE 6. FAIR VALUE

Securities traded on stock exchanges, or quoted by NASDAQ, are valued according to the NASDAQ Stock Market, Inc. (“NASDAQ”) official closing price, if applicable, or at their last reported sale price as of the close of trading on the New York Stock Exchange (“NYSE”) (normally 4:00 P.M. Eastern Time). If a security is not traded that day, the security will be valued at its most recent bid price.

Securities traded in the over-the-counter market, but not quoted by NASDAQ, are valued at the last sale price (or, if the last sale price is not readily available, at the most recent closing bid price as quoted by brokers that make markets in the securities) at the close of trading on the NYSE.

Securities traded both in the over-the-counter market and on a stock exchange are valued according to the broadest and most representative market.

Securities and other assets that do not have market quotations readily available are valued at their fair value as determined by FCM, as the Board’s valuation designee under SEC rule 2a-5 of the 1940 Act. Those valuations are determined in accordance with the Valuation Procedures used by FCM, subject to oversight by the Board.

In pricing illiquid, privately placed securities, FCM, as the valuation designee, is responsible for (1) determining overall valuation guidelines and (2) ensuring that the investments of the Company are valued within the prescribed guidelines.

FCM and the Board receive information and recommendations from an independent valuation firm.

The values assigned to these investments are based on available information and do not necessarily represent amounts that might ultimately be realized when that investment is sold, as such amounts depend on future circumstances and cannot reasonably be determined until the individual investments are actually liquidated or become readily marketable.

APPROACHES TO DETERMINING FAIR VALUE. GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). In effect, GAAP applies fair value terminology to all valuations whereas the 1940 Act applies market value terminology to readily marketable assets and fair value terminology to other assets.

The main approaches to measuring fair value utilized are the market approach, the income approach, and the asset-based approach. The choice of which approach to use in a particular situation depends on the specific facts and circumstances associated with the company, as well as the purpose for which the valuation analysis is being conducted. FCM and the independent valuation firm rely primarily on the market approach. We also considered the income and asset-based approaches in our analysis because certain of the portfolio companies do not have substantial operating earnings relative to the value of their underlying assets.

- Market Approach (M): The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. For example, the market approach often uses market multiples derived from a set of comparables. Multiples might lie in ranges with a different multiple for each comparable. The selection of where within the range each appropriate multiple falls requires the use of judgment in considering factors specific to the measurement (qualitative and quantitative).

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

- Income Approach (I): The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present value amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Those valuation techniques include present value techniques; option-pricing models, such as the Black-Scholes-Merton formula (a closed-form model) and a binomial model (a lattice model), which incorporate present value techniques; and the multi-period excess earnings method, which is used to measure the fair value of certain assets.
- Asset-Based Approach (A): The asset-based approach examines the value of a company's assets net of its liabilities to derive a value for the equity holders.

FAIR VALUE MEASUREMENT. In accordance with the guidance from the Financial Accounting Standards Board on fair value measurements and disclosures under GAAP, the Company discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (Level 3 measurements).

The guidance establishes three levels of the fair value hierarchy as follows:

- Level 1 -** Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the date of measurement.
- Level 2 -** Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument in an inactive market, prices for similar instruments in an active or inactive market, interest rates, prepayment speeds, credit risks, yield curves, default rates, and similar data.
- Level 3 -** Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Company's own assumptions about the assumptions a market participant would use in valuing the asset or liability based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Firsthand Technology Value Fund, Inc.**Notes to Consolidated Financial Statements – continued****MARCH 31, 2026 (UNAUDITED)**

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Company's net assets as of March 31, 2026:

At the end of each calendar quarter, management evaluates the Level 2 and Level 3 assets and liabilities for changes in liquidity, including but not limited to: whether a broker is willing to execute at the quoted price, the depth and consistency of prices from third party services, and the existence of contemporaneous, observable trades in the market. Additionally, management evaluates the Level 1 and Level 2 assets and liabilities on a quarterly basis for changes in listings or delistings on national exchanges.

Firsthand Technology Value Fund, Inc.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

The table below represents quantitative disclosure about significant unobservable inputs for Level 3 fair value measurements at March 31, 2026:

	FAIR VALUE AT 03/31/26		VALUATION TECHNIQUES	UNOBSERVABLE INPUTS	RANGE (WEIGHTED AVG.) (1)
Direct venture capital investments: Advanced Materials	\$	0.1M	Market Comparable Companies Option Pricing Model	Revenue Multiple ⁽²⁾ Years to Maturity ⁽²⁾ Volatility ⁽²⁾ Risk-Free Rate ⁽²⁾ Discount for Lack of Marketability ⁽³⁾	0.7x – 0.8x (0.8x) 5 years (5 years) 50.0% (50%) 3.92% (3.92%) 22.8% (22.8%)
Direct venture capital investments: Automotive	\$	0.0M	Liquidation Value	Market Value of Invested Capital ⁽²⁾	\$0 (\$0)
Direct venture capital investments: Medical Devices	\$	0.0M	Cash Value Market Comparable Companies Market Comparable Transactions	Revenue Multiple ⁽²⁾ Risk Free Rate ⁽²⁾ Going Concern Probability ⁽¹⁾ Volatility ⁽²⁾	0.3x – 0.5x (0.4x) 3.81% (3.81%) 5% (10%) 55% (55%)
Direct venture capital investments: Semiconductor Equipment	\$	0.0M	Recent Transactions	Equity Proceeds from Private Transactions ⁽²⁾	\$0 (\$0)

(1) Weighted average is calculated by weighing the significant unobservable input by the relative fair value of each investment in the category.

(2) An increase in the input would result in an increase in the security's valuation; a decrease in the input would result in a decrease in the security's valuation.

(3) An increase in the inputs would result in a decrease in the securities valuation; a decrease in the input would result in an increase in the security's valuation.

Changes in any of our unobservable inputs, individually, may change the fair value of certain of the Company's investments.

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Company's investments may fluctuate from period to period. Additionally, the fair value of the Company's investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that the Company may ultimately realize. Further, such investments are generally subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. If the Company was required to liquidate a portfolio investment in a forced or liquidation sale, it could realize significantly less than the value at which the Company has recorded it.

Firsthand Technology Value Fund, Inc.**Notes to Consolidated Financial Statements – continued****MARCH 31, 2026 (UNAUDITED)**

In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the unrealized gains or losses reflected in the valuations currently assigned.

NOTE 7. FEDERAL INCOME TAXES

Beginning in 2018, we were no longer able to qualify as a RIC under Subchapter M of the Code. The increase in value that resulted from the initial public offerings (IPOs) of Pivotal Systems and Revasum meant that we were no longer able to satisfy the diversification requirements for qualification as a RIC. As a result of this change, we were taxed as a corporation for our fiscal year ended December 31, 2018, and will continue to be taxed in that manner for future fiscal years, paying federal and applicable state corporate taxes on our taxable income, unless and until we are able to once again qualify as a RIC, based on changes in the composition of our portfolio. Consequently, at the close of each fiscal quarter beginning with the quarter ended June 30, 2018, we will record a deferred tax liability for any net realized gains and net ordinary income for the year-to-date period plus net unrealized gains as of the end of the quarter.

The reorganization described in Note 1 (the formation of FVI as a fully owned subsidiary for investment activities) was structured to avoid any adverse tax consequences for the Company and its shareholders. For the fiscal years which the Company operated as a RIC, we believe Company's engaging in investment activities through FVI did not, in our view, jeopardize the Company's ability to continue to qualify as a RIC under the Code at that time when the Company was eligible to be treated as a RIC.

The following information is based upon the U.S. federal income tax cost of portfolio investments as of March 31, 2026.

	FEDERAL INCOME TAX COST:
Gross unrealized appreciation	\$ —
Gross unrealized depreciation	(89,713,945)
Net unrealized depreciation	<u>\$ (89,713,945)</u>
Federal income tax cost, Investments	<u>\$ 89,860,375</u>

The Company did not qualify as a regulated investment company pursuant to Subchapter M of the Internal Revenue Code, therefore it is taxed as a corporation. As a corporation, the Company is obligated to pay federal and state income tax on taxable income. The Company's net deferred tax asset balance has a full valuation allowance based on management's estimate of future realization of such assets. The Company is currently using an estimated tax rate of 21% for Federal and 6.98% for state taxes.

The Company's income tax provision consists of the following as of December 31, 2025:

Deferred tax (expense)/benefit	
Federal	\$ —
State	—
Total deferred tax (expense)/benefit	<u>\$ —</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Such temporary differences are principally: (i) taxes on unrealized gains/(losses), which are attributable to the temporary difference between fair market value and tax basis, and (ii) the net tax benefit of accumulated net operating losses and capital loss carryforwards. Deferred tax assets and liabilities are measured using effective tax rates expected to apply to taxable income in the years such temporary differences are realized or otherwise settled.

Firsthand Technology Value Fund, Inc.**Notes to Consolidated Financial Statements – continued****MARCH 31, 2026 (UNAUDITED)**

Components of the Company's deferred tax assets and liabilities as of December 31, 2025 are as follows:

	AMOUNT
Deferred tax assets:	
Net operating loss carryforward	\$ 3,886,290
Capital loss carryforward	13,605,036
Net unrealized losses (gains) on investment securities	25,095,009
Total deferred tax assets, net	42,586,335
Valuation allowance	(42,586,335)
Net	\$ —

For the year ended December 31, 2025, the Company had an effective tax rate of 0% and a statutory tax rate of 21% (27.98% with state income tax) with the difference being attributable to changes in the components of the deferred tax assets and the valuation allowance account.

The effective tax rate and statutory federal income tax rate for the three-month periods ended March 31, 2026 and 2025 were as follows:

	THREE MONTHS ENDED MARCH 31, 2026	THREE MONTHS ENDED MARCH 31, 2025
Effective tax rate	0%	0%
Statutory federal income tax rate	21%	21%

The variance in the effective tax rate and statutory federal income tax rate for the three-month period ended March 31, 2026, is the result of changes in the deferred tax assets and related valuation allowance account. At March 31, 2026, the Company has established a full valuation allowance on its net deferred tax assets.

To the extent the Company has a deferred tax asset or if a portion of the deferred tax liability is offset by a tax asset resulting from net operating losses, consideration is given to whether or not a valuation allowance is required against the deferred tax asset amount. A valuation allowance is required if, based on the evaluation criterion provided by Accounting Standard Codification ("ASC") 740, Income Taxes (ASC 740), it is more-likely-than-not that some portion or all of the deferred tax asset will not be realized. Among the factors considered in assessing the Company's valuation allowance are: the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of the statutory carryforward periods, and the associated risks that operating and capital loss carryforwards may expire unused. Based on the Company's assessment, it has determined that in the future it is more likely than not that the Company will not generate the necessary appropriate character of income within the carryforward periods to realize its deferred tax assets, and as such, has placed a full allowance on the deferred tax assets.

From time to time, and as new information becomes available, the Company will modify its forecasts, estimates or assumptions regarding its deferred tax liability or asset.

Firsthand Technology Value Fund, Inc.**Notes to Consolidated Financial Statements – continued****MARCH 31, 2026 (UNAUDITED)**

Modifications of the Company's estimates or assumptions regarding its deferred tax liability and/or asset balances and any applicable valuation allowance, changes in generally accepted accounting principles or related guidance or interpretations thereof, limitations imposed on net operating losses (if any), and changes in applicable tax law could result in increases or decreases in the Company's NAV, which could be material. Such changes could have a material impact on the Company's NAV and results of operations with respect to the Company's shareholders in the period it is recorded, even though the shareholders at such time might not have held shares in the Company at the time the deferred tax asset or liability had been established.

The Company's policy is to classify interest and penalties associated with underpayment of federal and state income taxes, if any, as income tax expense on its Statement of Operations. As of December 31, 2025, the Company had \$8,850 of interest and penalties associated with underpayment of income taxes.

The Company files income tax returns in the U.S. federal jurisdiction and California. The Company has reviewed all major jurisdictions and concluded that there is no significant impact on the Company's net assets and no tax liability resulting from unrecognized tax benefits relating to uncertain tax positions expected to be taken on its tax returns. Furthermore, management of the Company is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next 12 months.

As of December 31, 2025, the Company had net operating loss carryforwards for federal and state of income tax purposes of \$13,889,528, which may be carried forward indefinitely.

As of December 31, 2025, the Company had net capital loss carryforwards for federal and state income tax purposes, which may be carried forward for 5 years, as follows:

EXPIRATION DATE	AMOUNT
12/31/27	3,129,665
12/31/28	7,864,982
12/31/29	11,686,668
12/31/30	25,942,832
Total	\$ 48,624,147

NOTE 8. INVESTMENT TRANSACTIONS

Investment transactions (excluding short-term investments) were as follows for the quarter ended March 31, 2026.

PURCHASES AND SALES

Purchase of investment securities	\$ —
Proceeds from sales and maturities of investment securities	\$ —

The Fund may purchase securities from, or sell securities to, an affiliated Fund under specific conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Funds from or to another Fund or portfolio that is or could be considered an affiliate by virtue of having a common investment advisor (or affiliated investment advisors), common Trustees, and/or common officers complies with Rule 17a-7 of the 1940 Act. Further, as defined under the procedures, each transaction is effected at the current market price. Pursuant to these procedures, for the three months ended March 31, 2026, Firsthand Technology Value Fund did not purchase or sell securities to an affiliated fund.

NOTE 9. SHARE BUYBACKS

SHARE BUYBACKS. On April 26, 2016, the Board of Directors of the Fund approved a discretionary share repurchase plan (the "Plan"). Pursuant to the Plan, the Fund was authorized to purchase in the open market up to \$2 million worth of its common stock. The Plan allowed the Fund to acquire its own shares at certain thresholds below its NAV per share, in accordance with the guidelines specified in Rule 10b-18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The intent of the Plan was to increase NAV per share and thereby enhance shareholder value. The Fund completed the repurchase plan in September 2016, having repurchased and retired a total of 272,008 shares of stock, at a total cost of approximately \$2 million.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

On November 10, 2017, the Board of Directors of the Fund approved a discretionary share purchase plan (the “Plan”). Pursuant to the Plan, the Fund was authorized to purchase in the open market up to \$2 million worth of its common stock. The Plan allowed the Fund to acquire its own shares in accordance with the guidelines specified in Rule 10b-18 of the Exchange Act. The intent of the Plan was to increase NAV per share and thereby enhance shareholder value. As of December 31, 2017, the Fund had repurchased and retired 128,551 shares of stock at a total cost of approximately \$1.1 million. The Fund had 7,302,146 shares outstanding as of December 31, 2017.

On August 31, 2018, the Fund announced a plan to repurchase up to \$2 million worth of SVVC stock in the open market by March 31, 2019. The Fund completed this open market repurchase plan on October 24, 2018. Through that date, the Fund repurchased 123,376 shares at an average price of \$16.21 per share, for total consideration of \$2.0 million. As of December 31, 2018, the Fund had 7,178,770 shares outstanding.

TENDER OFFERS. On December 22, 2014, pursuant to our agreement with a shareholder, the Fund commenced a tender offer to purchase up to \$20 million of its issued and outstanding common shares for cash at a price per share equal to 95% of the Company’s NAV per share determined as of the close of ordinary trading on the NASDAQ Global Market on December 31, 2014 (\$23.2702 per share). The tender offer, which expired on January 22, 2015 at 12:00 midnight, New York City time, was oversubscribed. Because the number of shares tendered exceeded the maximum amount of its offer, the Fund purchased shares from tendering shareholders on a pro-rata basis based on the number of shares properly tendered. Of the 5,044,728 shares properly tendered, the Fund purchased 859,468 shares of common stock pursuant to the tender offer.

On December 16, 2019, the Fund announced the commencement of a “modified Dutch auction” tender offer to purchase up to \$2 million of its common stock at a price per share not less than \$6.00 and not greater than \$8.00, in \$0.10 increments. The tender offer expired on February 14, 2020, and resulted in the purchase by the Fund of 285,714 shares of common stock at a price of \$7.00 per share. As of December 31, 2020, the Fund had 6,893,056 shares outstanding.

NOTE 10. INVESTMENTS IN AFFILIATES AND CONTROLLED INVESTMENTS

Under the 1940 Act, the Company is required to identify investments where it owns greater than 5% (but less than 25%) of the portfolio company's outstanding voting shares as an affiliate of the Company. Also, under the 1940 Act, the Company is required to identify investments where it owns greater than 25% of the portfolio company's outstanding voting shares as a controlled investment of the Company. A summary of the Company's investments in affiliates and controlled investments for the period from December 31, 2025, through March 31, 2026, is noted below:

(1) CDI CHESS Depository Interests

As of March 31, 2026, Kevin Landis, the Company's Chairman, President and Chief Executive Officer, represented the Company and sat on the boards of directors of IntraOp Medical Corp.; Revasum, Inc.; and Wrightspeed, Inc. As of March 31, 2026, Mr. Landis served as interim CEO at IntraOp Medical Corp. and Wrightspeed, Inc. Serving as a director or officer of portfolio companies may cause conflicts of interest. The Advisor has adopted various procedures to ensure that the Company will not be unfavorably affected by these potential conflicts.

Firsthand Technology Value Fund, Inc.

Notes to Consolidated Financial Statements – continued

MARCH 31, 2026 (UNAUDITED)

NOTE 11. MARKET DISRUPTION AND GEOPOLITICAL RISKS

The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. The Company's portfolio companies may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, trade disputes, supply chain disruptions, natural disasters, climate change and climate-related events, pandemics, epidemics, terrorism, cybersecurity events, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, territorial invasions and global economic sanctions implemented in response, natural disasters, social and political discord or debt crises and downgrades, global pandemics and public health crises, among others, may result in market volatility and may have long-term effects on both the U.S. and global financial markets. For example, military conflicts and wars, such as Russia's invasion of Ukraine and the war among Israel, Hamas and other militant groups in the Middle East, have caused and could continue to cause market disruptions in the regions and globally. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value the Company's portfolio.

Therefore, the Company could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions, you could lose your entire investment.

NOTE 12. LITIGATION

As of 3/31/2026, the Fund was engaged in multiple legal proceedings as described below.

VestedCap v. IntraOp Medical Corp., et al.

On September 5, 2023, VestedCap, LLC ("VestedCap") filed a complaint in Superior Court for the State of California. The case is venued in Santa Clara County (Case No. 23-CV-422238.) As originally filed, the lawsuit asserted claims against one of the Fund's portfolio companies, IntraOp Medical Corporation. VestedCap also named Kevin Landis as a co-defendant. In the original complaint, VestedCap asserted claims for breach of contract, fraud and deceit, conversion, unjust enrichment, and judicial foreclosure. IntraOp and Kevin Landis denied all claims against them.

On January 22, 2025, VestedCap amended its complaint and added the Fund as an additional co-defendant. In the amended complaint, VestedCap has asserted the following claims against the Fund: wire fraud, violations of the RICO Act, fraud and deceit, conversion, and declaratory relief. VestedCap has also asserted that the Fund is the alter ego of co-defendants IntraOp Medical Corporation and Kevin Landis and therefore should be a party to the case. On January 16, 2026, VestedCap filed a Second Amended Complaint. The Second Amended Complaint asserts no new causes of action but does contain revised factual allegations in connection with the previously asserted fraud claims.

The Fund believes that the allegations in the operative complaint lack merit and has filed an answer denying all wrongdoing. The Fund intends to vigorously defend itself. The parties have exchanged documents and written discovery responses. Some depositions have been taken and others will occur during March and April 2026. The case has not been set for trial but the Court has scheduled a trial setting conference for late-April 2026. A trial in 2027 is expected.

Star Equity Fund L.P. v. Firsthand Capital Management, Inc., et al.

On February 28, 2025, Star Equity Fund, L.P., an investor in Firsthand Technology Value Fund, filed a lawsuit against the Fund, Firsthand Capital Management Company, and various individual defendants. The lawsuit asserts derivative claims on behalf of the Fund. Specifically, it asserts counts against the Management Company for alleged violations of Section 10(b) of the Securities Exchange Act of 1934; (II) violations of Section 20(a) of the Securities Exchange Act of 1934; (III) breach of fiduciary duties; (V) appointment of a receiver; and (VI) aiding and abetting breaches of fiduciary duties. Star Equity has also asserted a direct cause of action against the Management Company (Count IV) as a purported third-party beneficiary of the management agreement between the Management Company and the Fund. The Fund and the Management Company deny all allegations of wrongdoing.

On September 18, 2025, the Fund and the Management Company filed motions to dismiss Star Equity's Complaint. In response, Star Equity voluntarily dismissed its direct and derivative breach of fiduciary duty claim, its direct and derivative breach of contract claim, and its aiding and abetting the breach of fiduciary duty claim. The dismissals were without prejudice and the claims may be re-filed. The Court then dismissed the remaining claims against all defendants on March 30, 2026. Star Equity filed an appeal on April 29, 2026.

NOTE 13. GOING CONCERN

The accompanying financial statements have been prepared on a going concern basis, which assumes the Company will be able to realize its assets and settle its liabilities in the normal course of business for the foreseeable future. During the period ended March 31, 2026, the Company incurred a net loss of \$184,099 and had no cash flows from operations. As of that date, the Company's liabilities exceeded its assets by \$444,057. These conditions, along with other matters, raise substantial doubt about the Company's ability to continue as a going concern.

Management's plans to mitigate these conditions include sale of assets, liquidation of Company, infusion of cash from Advisor, raising capital, and reducing overhead costs. While management believes these plans are probable, there is no guarantee they will be successful. These financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

NOTE 14. SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Company through the date the financial statements were issued and Management has evaluated the impact of all subsequent events on the Company through the date the financial statements were issued and determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

FORWARD-LOOKING STATEMENTS

The matters discussed in this report, as well as in future oral and written statements by management of the Company, include forward-looking statements based on current management expectations that involve substantial risks and uncertainties which could cause actual results to differ materially from the results expressed in, or implied by, these forward-looking statements. Forward-looking statements related to future events or our future financial performance. We generally identify forward-looking statements by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "could," "intends," "target," "projects," "contemplates," "believes," "estimates," "predicts," "potential," or "continue" or the negative of these terms or other similar words. Important assumptions include our ability to originate new investments and to achieve certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this report should not be regarded as a representation by us that our plans or objectives will be achieved. The forward-looking statements contained in this report include, without limitations, statements as to:

- our future operating results;
- our business prospects and the prospects of our portfolio companies and the impact of any potential economic downturn, which could impair our portfolio companies' ability to continue to operate and could lead to the loss of some or all of our investments in such portfolio companies;
- the impact of investments that we expect to make;
- the impact of current global economic conditions, including those caused by inflation, an elevated interest rate environment and geopolitical events;
- the impact of a protracted decline in the liquidity of the credit markets on our business;
- our informal relationships with third parties;
- the expected market for venture capital investments and our addressable market;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- our ability to access the equity market;
- the ability of our portfolio companies to achieve their objectives;
- our expected financings and investments;
- our regulatory structure and tax status;
- our ability to operate as a business development company and a regulated investment company ("RIC") and the fact that, beginning in 2018, we were no longer able to qualify as a RIC under Subchapter M of the Code;
- the adequacy of our cash resources and working capital;
- the timing of cash flows, if any, from the operation of our portfolio companies;
- the timing, form, and amount of any dividend distributions;
- impact of fluctuation of interest rates on our business;
- changes or potential disruptions in our operations and the operations of our portfolio companies, the economy, financial markets or political environment, including those caused by tariffs and trade disputes with other countries, supply chain issues, inflation and an elevated interest rate environment;
- risks associated with possible disruption in our operations, the operations of our portfolio companies or the economy generally due to terrorism, war or other geopolitical conflict, natural disasters, pandemics or cybersecurity incidents;
- valuation of any investments in portfolio companies particularly those having no liquid trading market; and
- our ability to recover unrealized losses.

You should not place undue reliance on these forward-looking statements. The forward-looking statements made in this report relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances occurring after the date of this report.

The following discussion should be read in conjunction with our consolidated financial statements and related notes and other financial information appearing elsewhere in this prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under "Risk Factors" and "Forward-Looking Statements" appearing elsewhere herein.

OVERVIEW

We are an externally managed, closed-end, non-diversified management investment company organized as a Maryland corporation that has elected to be treated as a BDC under the 1940 Act. As such, we are required to comply with certain regulatory requirements. For instance, we generally have to invest at least 70% of our total assets in “qualifying assets,” including securities of private or micro-cap public U.S. companies, cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. In addition, for tax purposes we are treated as a corporation and are subject to federal and state taxes on our income. FCM serves as our investment adviser and manages the investment process on a daily basis.

Our investment objective is to seek long-term growth of capital, principally by seeking capital gains on our equity and equity-related investments. There can be no assurance that we will achieve our investment objective. Under normal circumstances, we invest at least 80% of our net assets for investment purposes in technology companies. We consider technology companies to be those companies that derive at least 50% of their revenues from products and/or services within the information technology sector or in the “cleantech” sector. Information technology companies include, but are not limited to, those focused on computer hardware, software, telecommunications, networking, Internet, and consumer electronics. While there is no standard definition of cleantech, it is generally regarded as including goods and services designed to harness renewable energy and materials, eliminate emissions and waste, and reduce the use of natural resources. In addition, under normal circumstances we invest at least 70% of our total assets in privately held companies and public companies with market capitalizations of less than \$250 million. Our portfolio is primarily composed of equity and equity derivative securities of technology and cleantech companies (as defined above). These investments generally range between \$1 million and \$10 million each, although the investment size will vary proportionately with the size of our capital base. We acquire our investments through direct investments in private companies, negotiations with selling shareholders, and in organized secondary marketplaces for private securities.

While our primary focus is to invest in illiquid private technology and cleantech companies, we also may invest in micro-cap publicly traded companies. In addition, we may invest up to 30 percent of the portfolio in opportunistic investments that do not constitute the private companies and micro-cap public companies described above. These other investments may include investments in securities of public companies that are actively traded or in actively traded derivative securities such as options on securities or security indices. These other investments may also include investments in high-yield bonds, distressed debt, or securities of public companies that are actively traded and securities of companies located outside of the United States. Our investment activities are managed by FCM.

PORTFOLIO COMPOSITION

We make investments in securities of both public and private companies. Our portfolio investments consist principally of equity and equity-like securities, including common and preferred stock, warrants for the purchase of common and preferred stock, and convertible and term notes. The fair value of our investment portfolio was approximately 0.1 million as of March 31, 2026, as compared to approximately \$0.2 million as of December 31, 2025.

The following table summarizes the fair value of our investment portfolio by industry sector as of March 31, 2026, and December 31, 2025.

	March 31, 2026	December 31, 2025
Advanced Materials	(32.3)%	(71.3)%
Medical Devices	(0.2)%	(0.6)%
Equipment Leasing	0.0%	0.0%
Semiconductor Equipment	0.0%	0.0%
Automotive	0.0%	0.0%
Investment Companies	(0.5)	(23.9)
Other Liabilities in Excess of Other Assets	133.0	195.8
Net Assets	100%	100%

RESULTS OF OPERATIONS

Comparison of the three months ended March 31, 2026 to the three months ended March 31, 2025.

INVESTMENT INCOME

For the three months ended March 31, 2026, we had investment income of \$140 primarily attributable to interest accrued on money market funds.

For the three months ended March 31, 2025, we had investment income of \$5,965 primarily attributable to interest accrued on money market funds.

The lower level of investment income in the three months ended March 31, 2026, compared to the three months ended March 31, 2025, was due to decrease in investment in money market.

OPERATING EXPENSES

Operating expenses totaled approximately \$184,239 during the three months ended March 31, 2026, and \$119,183 during the three months ended March 31, 2025.

Significant components of net operating expenses for the three months ended March 31, 2026 were management fee expense of \$1,081 (see Note 4), professional fees (audit, legal, and consulting) of \$42,706, director fees of \$12,500, administration fees of \$28,985, and compliance fees \$27,206.

Significant components of net operating expenses for the three months ended March 31, 2025, were management fee expense of \$7,378 (see Note 4), professional fees (audit, legal, and consulting) of \$54,330, director fees of \$12,500, administration fees of \$29,091, and compliance fees \$27,206.

The higher level of net operating expenses for the three months ended March 31, 2026, compared to the three months ended March 31, 2025, is primarily attributable to an increase in deferred director fees.

NET INVESTMENT INCOME/(LOSS)

The net investment income/(loss) before taxes was \$(184,099) for the three months ended March 31, 2026, and \$(113,218) for the three months ended March 31, 2025.

The larger net investment loss for the three months ended March 31, 2026, as compared that for the three months ended March 31, 2025, is primarily attributable to an increase in deferred director fees.

NET INVESTMENT REALIZED GAINS AND LOSSES AND UNREALIZED APPRECIATION AND DEPRECIATION

A summary of the net realized and unrealized gains and losses on investments for the three-month period ended March 31, 2026, and March 31, 2025, is shown below.

	Three Months Ended March 31, 2026
Realized losses	\$ —
Net change in unrealized depreciation on investments	(24,830)
Net realized and unrealized losses on investments	<u>\$ (24,830)</u>

	As of March 31, 2026
Gross unrealized appreciation on portfolio investments	\$ —
Gross unrealized depreciation on portfolio investments	(89,713,945)
Net unrealized depreciation on portfolio investments	<u>\$ (89,713,945)</u>

	Three Months Ended March 31, 2025
Realized losses	\$ —
Net change in unrealized depreciation on investments	(110,240)
Net realized and unrealized losses on investments	<u>\$ (110,240)</u>

	As of March 31, 2025
Gross unrealized appreciation on portfolio investments	\$ —
Gross unrealized depreciation on portfolio investments	(115,732,292)
Net unrealized depreciation on portfolio investments	<u>\$ (115,732,292)</u>

During the three months ended March 31, 2026, we recognized no net realized gains/(losses).

During the three months ended March 31, 2026, net unrealized depreciation on total investments increased by \$24,830. The change in net unrealized appreciation and depreciation of our private investments is based on portfolio asset valuations determined in good faith by the valuation designee.

During the three months ended March 31, 2025, we recognized no net realized gains/(losses).

NET INCREASE/(DECREASE) IN ASSETS RESULTING FROM OPERATIONS AND CHANGE IN NET ASSETS PER SHARE

For the three months ended March 31, 2026, the net decrease in net assets resulting from operations (net of deferred taxes) totaled \$(208,929) and basic and fully diluted net change in net assets per share for the three months ended March 31, 2026, was \$(0.00).

For the three months ended March 31, 2025, the net decrease in net assets resulting from operations (net of deferred taxes) totaled \$(223,458) and basic and fully diluted net change in net assets per share for the three months ended March 31, 2025, was \$(0.03).

The smaller decline in net assets resulting from operations for the three months ended March 31, 2026, as compared to the three months ended March 31, 2025, is due primarily to a decline in net realized and unrealized losses.

DISTRIBUTION POLICY

Our board of directors will determine the timing and amount, if any, of our distributions. We are not required to pay any minimum level of distributions of our income or capital gains.

CONTRACTUAL OBLIGATIONS

The Fund does not have any Contractual Obligations that meet the requirements for disclosure under Item 303 of Regulation S-K.

OFF-BALANCE SHEET ARRANGEMENTS

The Fund does not have any Off-Balance Sheet Arrangements.

CRITICAL ACCOUNTING POLICIES

This discussion of our financial condition and results of operations is based upon our financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP. The preparation of these financial statements will require management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Changes in the economic environment, financial markets, and any other parameters used in determining such estimates could cause actual results to differ. In addition to the discussion below, we will describe our critical accounting policies in the notes to our future financial statements.

Valuation of Portfolio Investments

As a business development company, we generally invest in illiquid equity and equity derivatives of securities of venture capital stage technology companies. Under written procedures established by our board of directors, securities traded on stock exchanges, or quoted by NASDAQ, are valued according to the NASDAQ Stock Market, Inc. ("NASDAQ") official closing price, if applicable, or at their last reported sale price as of the close of trading on the New York Stock Exchange ("NYSE") (normally 4:00 P.M. Eastern Time). If a security is not traded that day, the security will be valued at its most recent bid price. Securities traded in the over-the-counter market, but not quoted by NASDAQ, are valued at the last sale price (or, if the last sale price is not readily available, at the most recent closing bid price as quoted by brokers that make markets in the securities) at the close of trading on the NYSE. Securities traded both in the over-the-counter market and on a stock exchange are valued according to the broadest and most representative market. We obtain these market values from an independent pricing service or at the mean between the bid and ask prices obtained from at least two brokers or dealers (if available, otherwise by a principal market maker or a primary market dealer). In addition, a large percentage of our portfolio investments are in the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We value these securities quarterly at fair value as determined in good faith by FCM as the valuation designee, subject to oversight by our Board of Directors. FCM may use the services of a nationally recognized independent valuation firm to aid it in determining the fair value of these securities.

[Table of Contents](#)

The methods for valuing these securities may include: fundamental analysis (sales, income, or earnings multiples, etc.), discounts from market prices of similar securities, purchase price of securities, subsequent private transactions in the security or related securities, or discounts applied to the nature and duration of restrictions on the disposition of the securities, as well as a combination of these and other factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time, and may be based on estimates, FCM's determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. Our net asset value could be adversely affected if FCM's determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

Revenue Recognition

We record interest or dividend income on an accrual basis to the extent that we expect to collect such amounts. We do not accrue as a receivable interest on loans and debt securities if we have reason to doubt our ability to collect such interest. Loan origination fees, original issue discount, and market discount are capitalized, and we amortize any such amounts as interest income. Upon the prepayment of a loan or debt security, any unamortized loan origination is recorded as interest income. We will record prepayment premiums on loans and debt securities as interest income when we receive such amounts.

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation

We measure realized gains or losses by the difference between the net proceeds from the repayment or sale and the cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized. Net change in unrealized appreciation or depreciation reflects the change in portfolio investment values during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized.

Recently Issued Accounting Standards

From time to time, new accounting pronouncements are issued by the FASB or other standards setting bodies that are adopted by us as of the specified effective date. We believe that the impact of recently issued standards that are not yet effective will not have a material impact on our financial statements upon effectiveness.

Inflation

Inflation has not had a significant effect on our results of operations in any of the reporting periods presented herein. However, our portfolio companies have experienced, and may in the future experience, the impacts of inflation on their operating results.

SUBSEQUENT EVENTS

Subsequent to the close of the fiscal quarter on March 31, 2026, and through the date of the issuance of the financial statements included herein, there have been no material events related to our portfolio of investments. Since that date, there have been no purchases or sales of securities by the Fund.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company's business activities contain elements of risk. We consider the principal types of market risk to be valuation risk and small company investment risk.

VALUATION RISK

Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which market quotations are readily available and (ii) fair value as determined in good faith by the FCM as our valuation designee pursuant to Rule 2a-5 under the 1940 Act for all other assets.

[Table of Contents](#)

Because there is typically no public market for our interests in the small privately-held companies in which we invest, the valuation of the securities in that portion of our portfolio is determined in good faith by FCM as the valuation designee, subject to oversight by our Board of Directors, in accordance with our Valuation Procedures. In addition, FCM may use the services of a nationally recognized independent valuation firm to aid it in determining the fair value of some of these securities. In the absence of a readily ascertainable market value, the determined value of our portfolio of securities may differ significantly from the values that would be placed on the portfolio if a ready market for such securities existed. Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment, although FCM's valuation policy is intended to provide a consistent basis for determining fair value of the portfolio investments. The methods for valuing these securities may include: fundamental analysis (sales, income, or earnings multiples, etc.), discounts from market prices of similar securities, purchase price of securities, subsequent private transactions in the security or related securities, or discounts applied to the nature and duration of restrictions on the disposition of the securities, as well as a combination of these and other factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time, and may be based on estimates, FCM's determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed.

Furthermore, changes in valuation of any of our investments in privately-held companies from one period to another may be volatile.

Investments in privately held, immature companies are inherently more volatile than investments in more mature businesses. Such immature businesses are inherently fragile and easily affected by both internal and external forces.

Our portfolio companies can lose much or all of their value suddenly in response to an internal or external adverse event. Conversely, these immature businesses can gain suddenly in value in response to an internal or external positive development.

The values assigned to our assets are based on available information and do not necessarily represent amounts that might ultimately be realized, as these amounts depend on future circumstances and cannot be reasonably determined until the individual investments are actually liquidated or become readily marketable. Upon sale of investments, the values that are ultimately realized may be different from what is presently estimated. This difference could be material.

PRIVATELY PLACED SMALL COMPANIES RISK

The Company invests in small companies, and its investments in these companies are considered speculative in nature. The Company's investments often include securities that are subject to legal or contractual restrictions on resale that adversely affect the liquidity and marketability of such securities. As a result, the Company is subject to risk of loss which may prevent our shareholders from achieving price appreciation, dividend distributions and return of capital.

WE CURRENTLY HOLD A PORTION OF OUR ASSETS IN CASH

As of March 31, 2026, a portion of the Company's assets was invested in cash and/or cash equivalents, which are expected to earn low yields. Given the current low interest rate environment, to the extent the management fee and other operating expenses exceed interest income on the cash holdings of the Company, the Company may experience losses. Furthermore, the investment advisory fee payable by us will not be reduced while our assets are invested in cash-equivalent securities.

In some cases, particularly for primary transactions, it is to our advantage to hold sufficient cash reserve so that we can make additional subsequent investments in these companies in order to (a) avoid having our earlier investments become diluted in future dilutive financings, (b) invest additional capital into existing portfolio companies in case additional investments are necessary, and/or (c) exercise warrants, options, or convertible securities that were acquired as part of the earlier transactions. For this reason, in the case of primary transactions (as opposed to secondary transactions where we do not buy the securities from the issuing companies but instead from existing stockholders), we typically reserve cash in an amount at least equal to our initial investment for such follow-on opportunities. Cash reserves held with respect to a particular investment should, therefore, decline as it is held longer, and will typically not be needed once that portfolio company becomes public or we determine it is no longer in our best interest to make investments in such portfolio company.

We may from time to time liquidate various investments. We are required to distribute substantially all of our net realized gains to stockholders on an annual basis and, therefore, will generally hold the proceeds of liquidated investments in cash pending its distribution.

ITEM 4. CONTROLS AND PROCEDURES.

(a) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective and provided reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act, that occurred during the fiscal quarter ended March 31, 2025, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

As of 3/31/2026, the Fund was engaged in multiple legal proceedings as described below.

VestedCap v. IntraOp Medical Corp., et. al.

On September 5, 2023, VestedCap, LLC (“VestedCap”) filed a complaint in Superior Court for the State of California. The case is venued in Santa Clara County (Case No. 23-CV-422238.) As originally filed, the lawsuit asserted claims against one of the Fund’s portfolio companies, IntraOp Medical Corporation. VestedCap also named Kevin Landis as a co-defendant. In the original complaint, VestedCap asserted claims for breach of contract, fraud and deceit, conversion, unjust enrichment, and judicial foreclosure. IntraOp and Kevin Landis denied all claims against them.

On January 22, 2025, VestedCap amended its complaint and added the Fund as an additional co-defendant. In the amended complaint, VestedCap has asserted the following claims against the Fund: wire fraud, violations of the RICO Act, fraud and deceit, conversion, and declaratory relief. VestedCap has also asserted that the Fund is the alter ego of co-defendants IntraOp Medical Corporation and Kevin Landis and therefore should be a party to the case. On January 16, 2026, VestedCap filed a Second Amended Complaint. The Second Amended Complaint asserts no new causes of action but does contain revised factual allegations in connection with the previously asserted fraud claims.

The Fund believes that the allegations in the operative complaint lack merit and has filed an answer denying all wrongdoing. The Fund intends to vigorously defend itself. The parties have exchanged documents and written discovery responses. Some depositions have been taken and others will occur during March and April 2026. The case has not been set for trial but the Court has scheduled a trial setting conference for late-April 2026. A trial in 2027 is expected.

Star Equity Fund L.P. v. Firsthand Capital Management, Inc., et al.

On February 28, 2025, Star Equity Fund, L.P., an investor in Firsthand Technology Value Fund, filed a lawsuit against the Fund, Firsthand Capital Management Company, and various individual defendants. The lawsuit asserts derivative claims on behalf of the Fund. Specifically, it asserts counts against the Management Company for alleged violations of Section 10(b) of the Securities Exchange Act of 1934; (II) violations of Section 20(a) of the Securities Exchange Act of 1934; (III) breach of fiduciary duties; (V) appointment of a receiver; and (VI) aiding and abetting breaches of fiduciary duties. Star Equity has also asserted a direct cause of action against the Management Company (Count IV) as a purported third-party beneficiary of the management agreement between the Management Company and the Fund. The Fund and the Management Company deny all allegations of wrongdoing.

On September 18, 2025, the Fund and the Management Company filed motions to dismiss Star Equity’s Complaint. In response, Star Equity voluntarily dismissed its direct and derivative breach of fiduciary duty claim, its direct and derivative breach of contract claim, and its aiding and abetting the breach of fiduciary duty claim. The dismissals were without prejudice and the claims may be re-filed. The Court then dismissed the remaining claims against all defendants on March 30, 2026. Star Equity filed an appeal on April 29, 2026.

ITEM 1A. RISK FACTORS.

In addition to the other information set forth in this report, you should carefully consider the risk factor discussed below and the risk factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2024, which could materially affect our business, financial condition and/or operating results. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and/or operating results.

CHANGES TO U.S. TARIFF AND IMPORT/EXPORT REGULATIONS MAY HAVE A NEGATIVE EFFECT ON OUR PORTFOLIO COMPANIES AND, IN TURN, ON OUR PERFORMANCE.

There have been significant changes to United States trade policies, treaties and tariffs, and in the future there may be additional significant changes. These and any future developments, and continued uncertainty surrounding trade policies, treaties and tariffs, may have a material adverse effect on global economic conditions, inflation and the stability of global financial markets, and may significantly reduce global trade and, in particular, trade between the impacted nations and the United States. Any of these factors could depress economic activity and restrict our portfolio companies’ access to suppliers or customers, increase their supply-chain costs and expenses and could have material adverse effects on our business, financial condition and results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None

ITEM 4. MINE SAFETY DISCLOSURES.

Not Applicable

ITEM 5. OTHER INFORMATION.

INVESTMENT MANAGEMENT AGREEMENT APPROVAL DISCLOSURE (UNAUDITED)

At a meeting held on August 8, 2025, the Board of Directors (the “Board”) of the Company approved the continuation of the Company’s Investment Management Agreement (the “Agreement”) with Firsthand Capital Management, Inc. (the “Adviser”) for an additional one-year period through August 31, 2026.

During the course of each year and in connection with their consideration of the continuation of the Agreement, the Board received various materials from the Adviser, including (i) information on the advisory personnel of the Adviser; (ii) information on the internal compliance procedures of the Adviser; (iii) comparative information showing how the Company’s fees and expenses compare to other business development companies that follow investment strategies similar to those of the Company; (iv) information regarding brokerage and portfolio transactions; (v) comparative information showing how the Company’s performance compares to other business development companies that follow investment strategies similar to those of the Company; and (vii) information on any material legal proceedings or regulatory audits or investigations affecting the Company or the Adviser.

After receiving and reviewing these materials, the Board, at a meeting called for such purpose (the “Meeting”), discussed the terms of the Agreement. The Meeting was held by video pursuant to an order issued on June 19, 2020 by the Securities and Exchange Commission, providing that business development companies are temporarily exempt from certain in-person board approval requirements, including with respect to the renewal of investment management agreements, due to conflicts related to the coronavirus. Representatives from the Adviser attended the Meeting and presented additional oral and written information to the Board to assist in its considerations. The Directors who are not parties to the Agreement or “interested persons” (as defined in the Investment Company Act of 1940, as amended) of any such party (the “Independent Directors”) also met in executive session to further discuss the terms of the Agreement and the information provided by the Adviser.

Discussed below are certain of the factors considered by the Board in continuing the Agreement. This discussion is not intended to be all-inclusive. The Board, including the Independent Directors, reviewed a variety of factors and considered a significant amount of information, including information received on an ongoing basis at Board and committee meetings and in various discussions with senior management of the Adviser relating specifically to the Adviser and the Agreement. The approval determination was made on the basis of each Director’s business judgment after consideration of all the information taken as a whole. Individual Directors may have given different weight to certain factors and assigned various degrees of materiality to information received in connection with the contract review process.

Taking all of the information and deliberations into account, the Independent Directors reviewed various factors presented to them, the detailed information provided by the Adviser at the Meeting and at other times throughout the year, and other relevant information and the following factors, none of which was dispositive in their decision whether to approve the Agreement:

Nature, Extent and Quality of Services

The Board received and considered various data and information regarding the nature, extent and quality of services provided to the Company by the Adviser. The most recent Form ADV for the Adviser was provided to the Board, as were written and oral responses of the Adviser to an information request submitted by independent legal counsel on behalf of the Independent Directors. The Board reviewed these responses, which included among other things, information about the background and experience of the investment personnel of the Adviser primarily responsible for day-to-day portfolio management of the Company. The Board also reviewed the Adviser’s overall ability to continue to manage and administer the Company as well as to oversee the service providers to the Company.

The Board evaluated the ability of the Adviser, considering its financial condition, resources, reputation and other attributes, to attract and retain highly qualified investment professionals, including research, advisory, supervisory and administrative personnel. In this regard, the Board considered information regarding the structure of the Adviser’s compensation program for its personnel involved in the management and administration of the Company, including incentive and retirement plans.

The Board considered the effectiveness of policies of the Company in achieving the best execution of portfolio transactions, whether and to what extent “soft dollar” benefits are used, the extent to which efforts are made to recapture transaction costs and the controls applicable to brokerage allocation procedures. The Board recognized that the Company’s investment transactions generally are privately negotiated by the Adviser in complex transactions rather than executed through a broker in a traditional exchange transaction. The Board reviewed the policies of the Adviser regarding the allocation of portfolio investment opportunities among the Company and other clients. The Board noted that the Adviser does not use “traditional soft-dollar” arrangements, where soft-dollar credits are generated based on the level of trades and then used for products or services from third parties. The Board also noted that the Adviser, from time to time, entered into arrangements where it received research (including invitations to conferences) from broker-dealers that the Adviser used to execute client trades, and that from time to time the Adviser had retained specialized technology consultants or other experts, at the expense of the Company with approval of the Board, for the purpose of evaluating some aspect of a prospective or existing portfolio holding. The Board also considered that the Adviser had outsourced the trading function to achieve certain operating efficiencies.

The Board also considered the market for the Company’s stock and the challenges associated with the Company’s raising additional capital under current market conditions.

In addition, the Board received and reviewed information on SEC and other inquiries, examinations and proceedings relating to the Company and the Adviser. The Board considered the investment and legal compliance programs of the Adviser, including its implementation of enhanced compliance policies and procedures in response to SEC rule changes and other regulatory initiatives, and the level of compliance attained by the Adviser.

Based on the above factors, together with those referenced below, the Board, including a majority of the Independent Directors, concluded that it was generally satisfied with the nature, extent and quality of the investment advisory services provided to the Company by the Adviser.

[Table of Contents](#)

Company Performance

The Board considered the Company's NAV performance and common stock performance results over the past year and since its inception on April 18, 2011. It also considered these results in comparison to the NAV performance results of the Company compared to relevant benchmark indices and comparable funds. The Board referenced the presentation regarding performance that had occurred earlier in the meeting. The Board noted that for the 12-month period ended June 30, 2025, the Fund's NAV had fallen 26.67% while its stock price fell 14.29%. The Directors were reminded that in the third quarter of 2023, the Fund suffered substantial setbacks involving IntraOp and Wrightspeed that led to write downs of most or all of the value of our securities of those two issuers. Later, in the second quarter of 2024, Revasum failed, and its assets were foreclosed upon by its senior creditor and subsequently sold, leaving no proceeds for equity holders such as SVVC. In all, between June 30, 2023, and June 30, 2025, the Fund's gross assets declined from approximately \$21 million to approximately \$1 million due primarily to the terminal failures of these three portfolio companies. The Board also considered the Advisor's attempts to improve shareholder value (and related practical constraints). In addition, the Board also reviewed FCM's efforts in working with the Board to explore the practicality of liquidation of the Company versus alternatives to liquidation of the Company.

Investment Advisory Fee Rate and Other Expenses

The Board reviewed and considered the proposed contractual management fee rate and incentive fee payable by the Company to the Adviser for investment advisory services ("Advisory Fee Rate"). Additionally, the Board received and considered information comparing the Advisory Fee Rate and the total expense ratio of the Company with those of other funds in an appropriate peer universe. The Board noted that the Company's advisory fee structure was comparable to that of funds in the business development company comparison group and given that many funds in the comparison group utilized leverage in their investment strategies, the Company's effective Advisory Fee Rate for holders of its common stock was lower than its peers.

The Board also noted that for a period of more than five years beginning in 2018, the Adviser, in an effort to support the Company and help it to preserve cash, had not collected any accrued management fees from the Company. The Adviser has also been paying certain Company expenses to further help the Company to preserve cash. Furthermore, effective September 30, 2023, the Company had entered into a fee waiver agreement with the Adviser (the "Fee Waiver Agreement"). Pursuant to the terms of the Fee Waiver Agreement, the Adviser agreed to (1) waive future accruals of the base management fee starting October 1, 2023, through December 31, 2024, and (2) waive \$2.5 million of base management fees that have been accrued but unpaid as of September 30, 2023. Effective March 31, 2024, the Company had entered into a fee waiver agreement with the Adviser (the "Amended Fee Waiver Agreement"). Pursuant to the terms of the Amended Fee Waiver Agreement, FCM agreed to waive \$3.0 million of base management fees that have been accrued but unpaid as of March 31, 2024. The Board also noted that in 2025, with the Company's Hera exit, the Adviser were able to recapture some of the waived fees in accordance with the terms of the Waiver Agreements.

Profitability

The Board received and considered a profitability analysis of the Adviser with respect to the Company. The Independent Directors also noted, as discussed in the Executive Session earlier in the Meeting, that they had met prior to this Meeting with Mr. Landis and Mr. Yee to discuss the Adviser's financial statements. The Board concluded that, in light of the costs of providing investment management and other services to the Company, the profits and other ancillary benefits that the Adviser received with regard to providing these services were not excessive.

Economies of Scale

The Board received and considered information regarding whether there have been economies of scale with respect to the management of the Company, whether the Company has appropriately benefited from any economies of scale, and whether there is potential for realization of any further economies of scale with respect to the Company. The consensus was that the Company is not large enough at this time to produce material economies of scale.

Information About Services to Other Clients

The Board also received and considered information about the services and fee rates offered by the Adviser to its other clients, namely Firsthand Technology Opportunities Fund and Firsthand Alternative Energy Fund, two registered investment companies also managed by the Adviser. The Board concluded that the Advisory Fee Rate charged by the Adviser to the Company was not comparable to other clients of the Adviser given the substantial differences in the services provided and the investment strategy employed. Where rates offered to those two clients were lower, the Board concluded that the costs associated with managing and operating a registered closed-end business development company when compared with a registered investment company provided a justification for a higher fee rate, notwithstanding a fee that contains a performance component.

Other Benefits to the Adviser

The Board received and considered information regarding potential "fall-out" or ancillary benefits to the Adviser as a result of its relationship with the Company. Such benefits could include, among others, benefits directly attributable to the relationship of the Adviser with the Company (such as "soft dollar" benefits) and benefits potentially derived from an increase in the business of the Adviser as a result of its relationship with the Company (such as the ability to market to shareholders other financial products offered by the Adviser).

Other Factors and Broader Review

Throughout the year, the Board regularly reviews and assesses the quality of the services that the Company receives from the Adviser. In this regard, the Board reviews reports of the Adviser in each of its quarterly meetings, which include, among other things, a detailed portfolio review and detailed fund performance reports. In addition, the Board interviews the portfolio manager of the Company at various times throughout the year.

The Independent Directors also considered the difficulties that the Adviser and the Company continue to face as a result of persistent legal challenges.

Conclusion

After considering the aforementioned factors and based on its deliberations and evaluation of the information provided to it, the Board concluded that re-approval of the Company's Investment Management Agreement was in the best interest of the Company and its shareholders.

ITEM 6. EXHIBITS.

EXHIBIT NUMBER	Description
<u>3.1</u>	<u>Registrant's Articles of Amendment and Restatement are incorporated by reference to Exhibit (a)(2) of Pre-Effective Amendment No. 1 to the Registrant's Registration Statement on Form N-2 (File No. 333-168195) as filed with the Securities and Exchange Commission on September 24, 2010.</u>
